- Importance**
- Have not yet formed opinion
 - Very unimportant
 - Unimportant
 - Neither important or unimportant
 - Important
 - Very important

Satisfaction with Post-Graduation Occupation

- Satisfaction**
- Have not yet formed opinion
 - Very dissatisfied
 - Somewhat dissatisfied
 - Neither satisfied or unsatisfied
 - Somewhat satisfied
 - Very satisfied

Outcomes Survey Report - Fall 2015 Data Details

- **This is an observational study, and any significant findings indicate that a variable has some *relationship* to another, not that one variable *causes* the other. Use caution when making important decisions based on observational data.**
- All outcomes data was pulled directly from the Outcomes Survey website. All academic data was pulled from Cognos on 12/21/16.
- The response rate for this semester of graduates was 42.52%.
- All students who responded to the survey were included, regardless of whether they actually graduated in their intended graduation semester.
- The following questions allowed multiple responses, and thus students may counted more than one in various categories: types of experiential education completed, types of service learning completed, reasons for not using resources, regions of job search, and general areas of job search.
- Though the helpfulness ratings of various resources were originally not numeric, they were converted to averages to allow better comparisons between helpfulness of resources.
- Only non-blank responses were included in the graphs, i.e., students who did not respond to a particular question were excluded from that question's data.
