Outcomes Survey Report
Summer 2014
5/25/16**

The following tabs explore the 1,331 total responses received through the Outcomes Survey from MSU Denver graduates in spring 2014 through spring 2015. Each tab profiles a question category and describes the distribution and nature of student responses.

Highlights:

- On average, 68.2% of students were employed (full time or part time) one year after graduation.
- The median income one year after graduation is \$35,000.
- A significant portion of students searched for jobs near their hometown (44.7%). Many students also choose to pursue additional education at schools in Colorado.
- The top three industries that students choose to work in are education, healthcare, and government.
- The top three areas of additional education that student pursue are health professions, social science, and education.
- The most common types of experiential education completed were internships and field experiences.
- Many students are unaware of the various resources offered by MSU Denver.

Please click on the tab below labeled "How to Explore Data" for more information!

How to Explore Data

The next few pages contain graphs that you can interact with in many detailed ways.

(You can click the left facing arrow on the toolbar to undo anything you do. You can also click any blank area of the visualization to unselect something you selected.)

Filters - You can click on boxes to check and uncheck data. This will change the graph to display data of that type only.

Expanding/condensing graphs - You can hover your cursor over certain titles of categories (e.g., majors, student classification) and click the plus sign to view more intricate data or the minus sign to view broader data.

Sort data – You can hover your cursor over certain titles of categories (e.g., majors, student classification) and click the little arrow/bars icon to sort the data in alphabetical order. You can also hover your cursor over the middle of the graph and click the same icon to sort the data in ascending or descending order.

Get more information – You can hover your cursor over any aspect of a chart (e.g., bars, lines, dots) to see how many individuals make up a category.

Include/exclude information - You can click on any aspect of a chart (e.g., bars, lines, dots) to change if it is included or excluded. Clicking 'keep only' will hide all other information while clicking 'exclude' will hide the aspect you clicked on. You can also try holding down the control key on your keyboard to select multiple parts of a chart.

Export/copy visualizations – If you'd like to share the visualization with someone else who does have Tableau Reader, you can simply forward the twbx. file that you received in your email!

If you'd like to share the visualization with someone else who does not have Tableau Reader, you can click on 'file' in the top toolbar and click 'print to PDF'. You can also click on the visualization to select it, and then click 'worksheet' in the top toolbar and then click 'copy image' to paste the visualization in an email. When sharing charts in these ways, they will be converted into a static image with no interactivity.

- Important
- Very important

Satisfaction with Post-Graduation Occupation

Job Satisfaction

- Have not yet formed opinion
- Very dissatisfied
- Somewhat dissatisfied
- Neither satisfied or unsatisfi..
- Somewhat satisfied
- Very satisfied

Outcomes Survey Report Data Details

- This is a static data report (i.e., it is a snapshot from the moment in time when it was pulled). Pulling the same data on a different day may have different results.
- This is an observational study, and any significant findings indicate that a variable has some *relationship* to another, not that one variable *causes* the other. Use caution when making important decisions based on observational data.
- Only first priority majors were counted in analyses.
- Real time reports were pulled from the Outcomes Survey website to obtain the most recent student responses.
- The following semesters of graduates were included in responses: Spring 2015, Fall 2014, Summer 2014, and Spring 2014.
- The average response rate across these four semesters was 26.4%.
- The following questions allowed multiple responses, and thus students may counted more than one in various categories: types of experiential education completed, types of service learning completed, reasons for not using resources, regions of job search, general areas of job search, and reasons for not accepting a job offer.
- Though the helpfulness ratings of various resources were originally not numeric, they were converted to averages to allow better comparisons between helpfulness of resources.
- Only non-blank responses were included in the graphs, i.e., students who did not respond to a particular question were excluded from that question's data.
- Academic data was pulled from Cognos on 5/16/16 and joined with data from the Outcomes Survey.
