

Upload an Unlisted Video to the YouTube App from a Mobile Device

1. Create a YouTube account if you do not already have one.
2. Select the “Create” button in the upper right corner. It looks like a tiny video camera.
3. Select your video.
4. On the next screen you have the option of trimming/editing the video. If you do any trimming, please ensure that you do not cut out any important content for your audition.
5. On the next screen, add the title and description. Under Privacy, **choose Unlisted**. Do not add a Location as this will make your video searchable. When done, select UPLOAD in the upper right corner.
6. The channel will let you know that it is processing the video. This usually takes a few minutes depending on the size and quality of the video and the connection speed.
7. Once uploaded, open your video and choose Share. A prompt will ask you to “Publish and share”, changing the privacy setting to Unlisted. Select Publish.
8. Select “Copy the link” and save it somewhere that you will be able to easily access while filling out your audition application.
9. Repeat these steps for your other two videos. Once you have the three links, you are ready to begin your online audition application.
