

How to Attract Students - Tips for Success

Evening & Weekend Hours

Many of our students have schedules where interning during evening and/or weekend hours is ideal. Please let us know if that's an option for your site when supervisors are present!

Agency Description

Make your agency come to life by including its mission, vision or a statement about the impact on its stakeholders and the community. What inspires you about working at your agency?!

Internship Description

Be as descriptive as possible in sharing the types of tasks students can engage in as an intern with your agency. What skills and experiences will they have to learn about? How much flexibility is there in their identifying some of their learning goals?

Does your agency offer paid internships or a stipend?

This can be a huge draw for students who are balancing the needs of being in school, working and completing field placements. Agencies offering compensation is a frequent student request. *Be sure to consult with your HR department and/or the Field Office if you have questions about rules around offering pay or stipends.

Application Notes

In this field, please indicate any specific instructions for applying to your agency. You may include who to contact, timing for when interviews will be scheduled, mandatory background checks, drug screens and/or trainings (e.g. MyClinicalExchange) needed prior to accepting or beginning a placement, etc.

Our students are eager to learn and contribute in meaningful ways to agencies. Your Sonia profile shows them just how they can be an asset to your agency!
