

STEM Summer Institute: Water in the Southwest

- * The MULTI STEM Summer Institute is designed as professional development for both in-service and pre-service teachers. Participants will work on earth science-based modules in grade-level bands to increase their STEM content knowledge, GLOBE[®] protocols, NGSS and Colorado Standards in the classroom. The program is designed to assist instructors in pedagogies that increase student awareness of and interest in STEM Careers, engage students underrepresented in STEM, develop 21st Century skills, and increase STEM content knowledge. Stipends will be provided to participants.

June 4 to 8, 2018

Auraria Campus
Denver, Colorado
