

# Socratic Lab

Desa & Mike

## What it is ....

Questions that spur creative, critical thought and analysis proceeding a laboratory answered collaboratively.

A line of questioning the builds up to a controversial topic (or topic with more than one answer) that relates to the laboratory. Where students use prior knowledge and evidence from the laboratory to answer the questions.

# Share your DO & Water Temp Data

Develop conclusion/analysis questions based on your data on DO and water temperature.

Discuss these questions in your groups

# Socratic Lab Questions

Develop real world questions that use the information and learning from the DO and water temp labs, these questions can be controversial, but need to be answered using evidence from the labs.

Discuss the questions in your group.

# Conclusion
