

DEPARTMENT OF PSYCHOLOGICAL SCIENCES

ABOUT US Psychological Sciences is one of the largest departments at MSU Denver, serving students majoring or minoring in Psychology or Human Development & Family Studies. Our programs, available both in person and fully online, connect classroom learning with applied, real-world experiences. Students complete engaging coursework and participate in enriching hands-on opportunities tailored to their interests. As a STEM discipline, students not only develop scientific literacy, but also gain transferrable skills that make them ready to enter the job market as soon as they graduate.

STUDENT OPPORTUNITIES There are countless ways to enhance your learning – serve as a teaching assistant to acquire teaching skills based on the science of learning; complete your own research projects in collaboration with our faculty and present your work at regional and national academic and professional conferences; join student organizations such as Psi Chi and the Research Club; or complete an internship in the field to jump-start your career.

MAJOR/MINOR Our majors and minors in Psychology and Human Development & Family Studies offer training based on the latest trends and prepare students for entry into the workforce or graduate school. Our programs are available both in-person and fully online, providing flexibility in course scheduling that can better align with students' lives and busy schedules.

- Behavior Analyst

ALUMNI QUOTE "I've always enjoyed Psychology. But the professors I had only stoked that passion. They challenged me to be better, and pushed me to continue learning, no matter how much I knew. I actually found my career because of an assignment in one of my Psych classes!"

- JT Campbell - Psychology B.A., 2019
