#### **Overview of the EAB Campus Climate Survey**

Purpose of the Survey

The EAB Sexual Violence Campus Climate Survey was developed by EAB, a bestpractice research firm located in Washington, DC. EAB provides research for student affairs executives on innovative practices for improving student engagement and enhancing the student experience.

The purpose of the climate survey is to understand the scope and nature of sexual violence on college and university campuses.

Survey Design

The EAB Campus Climate Survey is an anonymous online instrument that assesses students' perceptions, behaviors, attitudes, and experiences with regards to sexual violence on campus. The survey consists of a core section and three optional modules (Community Behaviors, Community Attitudes, and Relationship Dynamics).

Survey questions about prevention training received, bystander actions, and experiences with sexual violence, harassment, and intimate partner violence are restricted to students' experiences since the beginning of the fall 2015 semester.

Survey Development

To design the EAB Campus Climate Survey, the research team conducted an exhaustive literature review on sexual violence that included empirical research studies, relevant legislation, existing surveys, and White House task force and Department of Education guidance about current issues of sexual violence across higher education institutions.

Testing the Survey

Individuals at colleges and universities in the U.S. and Canada reviewed and provided feedback on the EAB Campus Climate Survey. The individuals who reviewed the survey at these institutions filled the following roles: assessment expert, counselor, faculty, prevention specialist, sexual assault expert, Title IX Coordinator, and Vice President of Student Affairs. The survey was also cognitively tested with recent college graduates to ensure that the language and content of the survey was relevant to their experience.

#### **Navigating the EAB Campus Climate Survey Report**

Use the links in the left-hand column of this Excel workbook to access high-level findings from each of the report sections, as well as the raw survey data. <u>Survey findings that are **highlighted in orange** throughout the report represent areas for additional research and/or opportunities for improvement.</u>

In most of the report sections, you can break down some survey results by class standing or gender (female and male only). A **blue button** at the top of a chart indicates this option. The results are not segmented by other student demographic categories either because counts in a given category were too low (15 students or less) to ensure student privacy, or because results were not substantially different across demographic characteristics.

We encourage you to partner with researchers at your institution to conduct further analyses of the survey data. You will be able to answer many institution-specific questions and gain additional insights as you explore the data over time.

#### **EAB Support and Resources**

Using the Survey Data to Make an Impact

At eab.com, you can find guidance on how to best share findings with the campus community and how to use survey results to better target prevention and response strategies on campus.

# Ongoing Research

The climate survey is just one component of EAB's ongoing work addressing campus sexual violence. Recent work from the Student Affairs Forum includes topics like prevention programming, building an effective university infrastructure, and campus reporting. You can access full white papers, studies, implementation toolkits, and archived webconferences about these topics at eab.com.

#### Additional Resources

The Sexual Violence Prevention and Response Resource Hub is an online repository of guidance documents, tools, and resources from EAB and others that provide promising practices to effectively address sexual violence on campus. You can access the hub on eab.com.

# Metropolitan State University of Denver Spring 2016 Administration

Student Sample and Response Rate	
Number of students invited to take the survey	17463
Total number of respondents	1842
Number of survey completers (reached the Thank You page)	1427
(answered at least one question, but did not reach the Thank	408
Number of disqualified respondents (did not consent to take the survey)	7
Total response rate	11%

Abnormal Response Patterns	
Number of identified straight-line respondents (respondents who answered the same option for multiple survey	1
Analytic sample size (total respondents - disqualified respondents - straight-line	1834

Survey Timeline	
Survey launch date (administrator invited students to take the survey and sent reminder	3/28/2016
Survey close date	4/18/2016

# **Frequently Asked Questions**

If the survey response rate is low, how representative are the survey results of our student population?

EAB is not able to determine to what extent the survey respondents reflect the makeup of your student population. Survey results may not be generalizable to the entire student body. You can work with a research expert on your campus to determine how representative the survey results are.

How does my institution's survey response rate compare with other spring 2016 cohort institutions?

The average survey response rate across the 34 participating institutions was 17%. The highest institutional response rate was 52% and the lowest was 1%.

What questions were asked on the survey?

The full survey can be found in your institution's EAB Box folder.

A number of students only partially completed the survey. How do I know how many students answered each question?

Included next to each data chart or table is "n=." "N" is the number of students who responded to the question. The average number of responses is given in charts and tables that combine multiple questions. This is reported as "avg. n=."

Were any survey questions required?

Survey respondents were required to consent to take the survey in order to proceed to the survey questions. No other survey elements were required.

Why can I break out survey results only by class standing and gender (female and male only)? I want to see sexual violence, harassment, and intimate partner violence broken out by demographic characteristics like race, sexual orientation, and gender identity.

In this high-level analysis, the climate survey team selectively broke out survey results that could best guide sexual violence prevention and response strategy. We did not break out results by demographic characteristics when response counts for a given demographic category were so low (15 or less) that student privacy would be jeopardized. This is most notable in the sexual violence, harassment, and intimate partner violence sections. We recommend you work with a research expert to further explore the data to answer all your institution's questions.

# Reporting an Incident of Unwanted Sexual Contact

# **Quick Takes**

 Respondents who experienced unwanted sexual contact most commonly told a roommate, friend, or classmate about the incident. A third of respondents told no one about the incident.

- Respondents most commonly received a positive response from the individuals they told.
- The most common concern respondents had about sharing their experience was not thinking it was serious enough to report.
- Almost all respondents did not report the incident to the school.

Did you use the school's formal

procedures to report the

incident(s)?

	people respondents told about dent of unwanted sexual t	%	Count
No. 1	Roommate/friend/classmate	49%	30

# Sexual Misconduct Reporting: Critical Areas for Colleges and Universities to Address

Study, Toolkit, and On-Demand Webconferences

Instances of sexual misconduct are vastly underreported on college and university campuses. This study discusses how to recalibrate education and outreach for the campus community, redesign reporting options for students, and streamline institutional report intake and management processes. This study also explores how institutions are using campus climate and reporting data to drive decision-making on campus.

# **Building an Effective University Infrastructure: Addressing Sexual Violence on Campus**

Study, Toolkit, and On-Demand Webconference

This study discusses how to establish an effective sexual violence task force, implement comprehensive prevention programming, and evaluate institutional efforts. The study also explores innovative strategies to build campus-wide awareness among students, faculty, and staff.

# **Beyond Orientation: New Approaches to Sexual Violence Prevention Programming**

Online White Paper and On-Demand Webconference

This white paper discusses the current state of sexual violence prevention on campus and shares innovative strategies and practices that provide students with high-quality learning opportunities to expand their knowledge and build their prevention skills throughout their time on campus.

# **EAB Sexual Violence Prevention and Response Resource Hub**

The hub is a repository of carefully vetted guidance documents, tools, and resources that provide best practices to effectively address sexual violence on campus. This is a growing space that will continue to expand as new guidance emerges in this topic area.

The hub is organized into six critical categories.

# **Federal Legislation and Guidance**

Resources to help institutions determine if they are compliant with recent federal legislation and guidance from the Department of Education regarding Title IX and the Clery Act.

#### **Prevention and Response**

Recommendations for creating strong sexual violence prevention programs and response structures, including a dedicated task force, on campus.

### **Policies, Procedures, and Community Partnerships**

Guidance in developing sexual misconduct policies and procedures and building effective community partnerships.

### Reporting, Investigations, and Adjudications

Strategies for improving reporting structures on campus, resolving sexual harassment claims, adjudicating sexual misconduct cases, and imposing student sanctions.

#### **Public Relations**

Strategies for working with local and national media so that issues of on-campus sexual violence are accurately contextualized and reported.

#### Websites

Online centers that provide research, resources, training, and tools on sexual violence prevention, response, policy, and legislative requirements.
