

Master of Science in Nutrition and Dietetics

Prerequisite Requirements¹:

Prerequisite Course Information:

<u>Prerequisite</u>	MSU Denver Course Information	Community College of Denver Course Information
Chemistry ²	CHE 1100: Principles of Chemistry	CHE 1011: Intro to Chemistry I
Organic Chemistry	CHE 2100: Introduction to Organic and	No transfer equivalency from CCD
Biological Chemistry	Biological Chemistry	CCC online course: CHE 1012
Human Anatomy and Physiology	BIO 2310: Human Anatomy and Physiology I BIO 2320: Human Anatomy and Physiology II	BIO 2101: Human Anatomy and Physiology I BIO 2102: Human Anatomy and Physiology II
Human Nutrition	NUT 3170: Advanced Human Nutrition ⁴	No transfer equivalency
Medical Nutrition Therapy	NUT 4800: Medical Nutrition Therapy ⁵	No transfer equivalency

¹This list is the comprehensive set of prerequisites for the MSND program, but some of these courses may have their own prerequisites at certain institutions (ex: at MSU Denver, college level math is a prerequisite for introductory chemistry). ²If you are planning to take your organic and biological chemistry prerequisite course at MSU Denver, make sure that you are taking a **single semester of introductory chemistry** (e.g. MSU Denver CHE 1100 or CCD CHE 1011) in preparation for it. ³Organic chemistry and biological chemistry cannot be taken at the introductory level. They must be higher level, having an introductory chemistry class as a prerequisite. Organic and biological chemistry can be taken as a single semester course. ⁴ All science prerequisites must be completed before students are permitted to take NUT 3170 ⁵NUT 3170 is a prerequisite for NUT 4800

Prerequisite Requirements for Starting the MSND Program:

- Students must have all science prerequisites completed prior to their entry term in the MSND program (chemistry, organic chemistry and biological chemistry, anatomy and physiology)
- The upper division human nutrition course and medical nutrition therapy course can be completed after starting the MSND program; these courses can be completed alongside graduate coursework
 - The upper division human nutrition course and medical nutrition therapy prerequisites must be completed with a grade of C- or higher within the first year of the term of acceptance into the program
