MAPPING ON CANVAS

ASSESSMENT

LEARNING

CORRECTION

the problem

The AOL team in the College of Business is working hard to bring each program into alignment with the AACSB requirements. The entrepreneurship program is underfire as the director just passed away, we are a new program and systems are not clearly in place to assess the designated learning objectives.

the solution

The goal of The AOL team is to close the learn, assess, change loop to demonstrate how we strengthen our programs from semester to semester.

We must demonstrate active engagement in the process over a three year period. While we do this naturally as faculty, we have to show evidence of the process.

process

Global Entrepreneurship MGT3850, is the course used to assess two LOs for the College of Business, Ethics and Global Solutions.

Beverly Reimer in Academic Affaris is working with me to attach college-based rubrics to specific test questions. The results would be available in an easy-to-access way that they can be monitored and reported to the CBUS AOL team.

here's how
